PROFESSIONAL SUMMARY

Full Stack Developer with nearly 3 years of professional experience building and maintaining Laravel applications, REST APIs, CRM systems, and multi-tenant SaaS platforms. Hands-on experience with PHP, MySQL, Vue.js, database design, background jobs and queues, middleware, Twilio/WhatsApp and VoIP integrations, and DigitalOcean-hosted deployments. Experienced in delivering maintainable business features, troubleshooting production issues, and improving application reliability from implementation through deployment.

TECHNICAL SKILLS

Backend	PHP, Laravel, MVC, OOP, REST APIs, middleware, authentication and authorization, jobs and queues
Frontend	Vue.js, JavaScript, React (working knowledge), Blade, HTML, CSS, Tailwind CSS
Database	MySQL, relational database design, Eloquent relationships, migrations, query optimization, tenant data isolation
Integrations	Twilio, Twilio WhatsApp API, Asterisk (installation & setup), WPForms, third-party REST APIs, Postman
Tools & Cloud	Git, GitHub, DigitalOcean (Droplets), DigitalOcean Spaces, Cloudways, Vite

PROFESSIONAL EXPERIENCE

Backend / Full Stack Developer | IT-Linked, Dera Ismail Khan | Jan 2024 – Present

- Build and maintain production Laravel applications, including RazorMail CRM and the LetSky Tourism visa-operations platform.
- Develop REST APIs, database workflows, reusable backend components, and third-party integrations using Laravel, PHP, MySQL, Vue.js, and the Twilio WhatsApp API.
- Installed and configured Asterisk for telephony features, and deploy applications and file storage on DigitalOcean and DigitalOcean Spaces.
- Improve reliability through background jobs and queues, database optimization, debugging, and production issue resolution in a Git-based team workflow.

Laravel Developer Intern | IT-Linked, Dera Ismail Khan | Nov 2023 – Dec 2023

- Built Laravel modules, controllers, models, Blade views, MySQL queries, and REST API endpoints.
- Supported bug fixing, application testing, and Git-based team collaboration.

SELECTED PROJECTS

RazorMail CRM | Multi-Tenant SaaS Platform

- Worked on converting the Krayin CRM foundation from a single-database application into a multi-tenant SaaS platform with tenant-specific domains and isolated databases.
- Implemented tenant-resolution middleware and dynamic database connection switching; built role-based access, visibility controls, and tenant-specific configuration.
- Built a WPForms API integration with field mapping and lead create/update synchronization, and migrated WhatsApp messaging to the Twilio WhatsApp API.

LetSky Tourism | Visa Operations Platform

- Developed features for a role-based platform where administrators, staff, agencies, and clients manage visa applications.
- Moved 10–12 document uploads per application into database-backed Laravel jobs, improving recovery after worker restarts and reducing request-timeout-related data loss.
- Stored confidential documents in private DigitalOcean Spaces with ownership checks and temporary signed URLs for authorized access.

EDUCATION & LANGUAGES

Bachelor of Science in Computer Science | Govt. Degree College, D.I. Khan (Gomal University) | Sep 2019 – Aug 2023
Languages: English (Fluent) | Urdu (Native)
